

EXCLUSIVITY THROUGH INTELLIGENT BUILDING SYSTEMS ON SIR BANI YAS ISLAND

The Anantara Desert Islands Resort & Spa on Sir Bani Yas Island, Abu Dhabi, uses Lonix technologies to create exclusive, modern style surroundings for their demanding guests who are used to expect excellence in all respects. The intelligent, integrated guest room controls, building automation and security systems combine the most advanced, proven technologies into a full solution for building controls and management. All systems are integrated using the open COBA Building Operating Systems platform, including guest room controls, building automation, access controls and digital video monitoring.

With its luxuriously appointed rooms, suites, spacious one-bedroom villas and truly luxurious two-bedroom Royal Villas, Desert Islands Resort & Spa invites the guests to live out their own Arabian nights in a destination that is anything but ordinary. There's the definite feeling of exclusivity on the island – combining the touch of Arabian royalty and history with an African touch of wildlife sanctuary.

About Lonix

Lonix (founded 1996) provides core technologies for home automation and intelligent building management systems. Solutions involving the forefront Lonix technologies bring comfortable, healthy and energy-efficient indoor conditions to all kinds of buildings, such as offices, commercial buildings, public properties and residences. In addition to Middle East, Lonix is active in Nordic countries, Baltic countries and Russia. More info: www.lonix.com
