

Convenient User Interface for BMS:

Easy Touch Screen access to Lonix BMS direct from the DDC Panel

The intelligent building system provider Lonix Ltd. (Finland) releases its new BMS Touch Screen Panel User Interface TSP10 for global distribution. Coming with the embedded WebUI application for Lonix COBA Software, the LX-TSP10 is the convenient user interface that provides easy access to Lonix BMS direct from the DDC Panel. TSP10 can be combined with a small COBA Server inside the DDC Panel, which allows for a user-friendly solution also for buildings where an external COBA Server is not used.

About Lonix

Lonix (founded 1996) is the leading supplier of integrated automation and security systems and intelligent building management systems using the Lonix COBA integration platform. Lonix is active in Europe, Russia, CIS-countries, Middle East, India, East Africa and Latin America. More info: www.lonix.com
