

Lonix Hotel Card Holder LX-S4-CH-P

LX-S4-CH-P is a stylish hotel card holder that switches electrical circuits on or off when a key card is inserted / removed. LX-S4-CH-P is activated by hotel key cards and turns electrical circuits on or off when a key card is inserted or removed from its slot. This assures that when guests are not in their room, energy will not be wasted on lights or appliances left on.

LX-S4-SH-P can control electrical loads up to 30A directly or it can control contactor or it can be connected to Lonix Guest Room Management system.

- Works by inserting a hotel card in the slot
- Installed on standard 3" by 3" back box
- Can control electrical load directly
- Can control electrical load via contactor
- Can be connected Lonix Guest Room Management System via Hotel module
- Standard color white
- Available also in gold color
